POPULAR EQUIPMENT OPERATING PROCEDURES AND SPECS

Always keep cooking equipment stored in a dry area on delivery.

Be aware of wind and condensation when trying to light equipment. If there is moisture in the air it may take additional time for the pilot to dry and light. Always try to use equipment in a well sheltered level area.

It is always best to plug units directly into dedicated outlets and avoid using extension cords. Try to avoid running more than one unit per outlet.

If you have any issues please contact your event rental consultant.

We are happy to have you call with any questions.

*Please note that all large equipment has a QR code with operating instructions.

Propane Grill

6', 3'

GRILL LIGHTING PROCEDURES

1. Be sure all valves are in the off position.
2. Connect propane tank, being sure it is tight.
3. Turn on propane.
4. Starting at the left side, light one burner at a time, turning valve to burner to the "ON" position.
5. Shut all valves off when finished.
6. Disconnect propane.

- 6' low pressure hose
- Powerful 200,000 BTU low pressure regulator and 200,000 BTU Lime Green QCC (Quick Connect Coupler)
- Burn tubes rated at 20,000 BTU's each and total grill BTU output of 160,000
- Adjustable, individually controlled, brass control valves with black knob

*Styles may vary.

Charcoal Grill

3', 5',
Deluxe 5'

- Cooking grate made from 10 to 2 gauge nickel plated steel interlaced wire with stay cool handles.
- 4 - 1" threaded, pipe legs screw into firebox for added security & strength.
- Single piece of 14 Gauge Carbon Steel Firebox with Black 1000°F High-Temp Powder Coat Finish (Deluxe grill ONLY)

*Styles may vary.

Propane Griddle

3', 6'
5'

GRIDDLE LIGHTING PROCEDURES

1. Be sure all valves are in the off position.
2. Connect propane tank, being sure it is tight.
3. Turn on propane.
4. Starting at the left side, light one burner at a time, turning valve to burner to the "ON" position.
5. Shut all valves off when finished.
6. Disconnect propane.

- 6' low pressure hose
- Powerful 200,000 BTU low pressure regulator and 200,000 BTU
- Burn tubes rated at 20,000 BTU's each and total grill BTU output of 160,000
- Adjustable, individually controlled, brass control valves with black knob

*Styles may vary.

Electric Fryer

Countertop Model

- Requires a 208/240 volt electrical connection
- Comes with a 6' cord and NEMA 6-30P plug
- UL Listed
- 301HLF fryer
- Holds about 2 gallons of oil
- 20 AMPS

**FRYER MUST BE RETURNED
FREE OF OIL AND FOOD**

*Styles may vary.

Propane Fryer

105,000
BTU

TROUBLE SHOOTING TIP

When lighting fryers, single and double ovens use patience. Units vary on the amount of time the plunger switch needs to be depressed.

**FRYER MUST BE RETURNED
FREE OF OIL AND FOOD**

- 14" double basket
- 40lb capacity (gallon of oil weighs 8lbs)
- Requires "K" rated extinguisher

*Styles may vary.

Blodgett Propane Convection Oven

**110V,
60,000 BTU**

FEATURES

- Full angle-iron frame
- Porcelain door handle with simultaneous door operation
- Triple-mounted pressure lock door design with turnbuckle assembly
- Modular slide out front control panel for easy cleaning
- Solid mineral fiber insulation at top, back, sides and bottom

INTERIOR CONSTRUCTION

- Double-sided porcelain baking compartment liner (14 gauge)
- Dual inlet blower wheel
- Five chrome-plated racks, eleven rack positions with a minimum of 1-5/8"

*Styles may vary.

OPERATION

- Dual Flow gas system combines direct and indirect heat
- Electronic spark ignition control system
- Removable dual tube burners
- Pressure regulator and manual gas service cut-off valve located in front control area

**MAXIMUM INPUT
60,000 BTU/HR (17.6KW)**

OPERATION INSTRUCTIONS

BLODGETT OVEN

OPERATES ON PROPANE GAS & 110 VOLTS AC ONLY

1. Make sure oven gas hose is attached to LP gas tank securely & turn gas on.
2. Don't forget to plug the oven in.
3. On some units there is a gas "on/off" switch located below the thermostat. This should be left on when the oven is in use.
4. The red "Cool Down" switch on the front of the oven should be in the "Auto" position.
5. Set temperature knob to the desired setting.
6. Turn the "Blower" switch to the "on" position.
7. Before the oven pilot burner will light, all air must be
 - a. You will hear a sparking sound; this is the oven attempting to light the pilot burner.
 - b. It will most likely not light on the first attempt as it is purging air from the gas line.
 - c. If the red indication light does not come on in the first 45 seconds or when the sparking sound stops, turn the "Blower" switch to the "off" position, wait 10 seconds & repeat.
 - d. It may be necessary to repeat several times.

purged from the pilot burner gas line.

8. When the red indication light comes on, the oven is calling for heat & the burner is on.
9. When the red indication light goes off, the oven is at temperature & the burner is off.
10. The red indication light will cycle on & off as the oven thermostat calls for heat.
11. When cooking is done, leave the “Blower” switch in the “on” position. Turn the red “Cool Down” switch to the “Manual” position & open the doors to cool down the oven.
12. When oven is cooled down (approx. 10 minutes) turn the “Blower” switch to “off”.

TROUBLE SHOOTING OVEN ISSUES

If after several times the oven indicating light does not turn on & the oven does not heat up, check the following points:

1. LP gas tank is turned to the on position.
2. LP gas line is not kinked & nothing is sitting on it.
3. LP gas line is tightened into the LP gas tank completely.
4. Red “Cool Down” switch is in the “Auto” position.

If all of these points have been checked & the indicating light still does not come on, then you need to purge the tank.

OPERATION INSTRUCTIONS

BLODGETT OVEN

CONTINUED

Purging the tank:

1. Make sure the LP gas tank is turned to the “on” position.
2. Slowly disconnect the LP gas line from the LP gas tank. You should hear some gas escape while you are disconnecting the hose from the tank.
3. While the tank is still in the “on” position, reconnect the LP gas line to the LP gas tank.
4. Make sure to tighten the LP gas line to the LP gas tank all the way.
5. Start the operation instructions again from Step 3.

This process lowers the pressure inside the tank to a point where the OPD valve on the tank disengages. The pressure inside the tank can increase to a point where the OPD valve is engaged due to a rise in the ambient temperature at time of use relative to the ambient temperature at the time the tank was filled.

If at this point you are still unable to operate the oven please call 833-888-PEAK. If it is after hours stay on the line and you will be prompted to use the emergency hot-line. A PEAK Event Services employee will attempt to resolve the issue.

Propane Stock Pot Stove

I-Burner

ASSEMBLED DIMENSIONS

- Surface of SH140L: 13.75"L x 13.75"W (189 sq. inches)

SUPERIOR COMPONENTS

- 3' High Pressure Hose & Regulator Kit
- Needle Valve Temperature Controls
- 60,000 BTU Burner
- 4 leg extensions (12")

MOBILITY

- Total weight of SH140L & 40 Qt Pot set is 33 lbs

*Styles may vary.

Electric Convection Oven

**220V
30 Amps
3 Phase**

- Cook quickly and efficiently with the convenience of convection.
- Holds 4 full sheet pans.
- Nema number L-15-30 plug configuration

CAVITY

29"W X 21"D X 22"H

*Styles may vary.

Southbend Convection Oven

54,000
BTU

- Stainless steel protection jacket to protect oven during transport and operation.
- Heavy duty stainless steel caster frame.
- Heavy duty all terrain pneumatic casters 8in, 1,000 maximum capacity each.
- Custom design rugged terrain chassis with integrated equipment shelf.
- Transportation door locks.
- Stay cool heavy duty door handle.
- Stainless steel top and bottom rear jacket covers for utility protection.
- 60 minute cook timer.
- Fully enameled oven cavity both inside and out.

*Styles may vary.

Refrigerator Cabinet 19 cu ft

115v/60/1
8.9 amps

- Reach-in
- One-section
- Stainless Steel door
- Stainless Steel front
- Aluminum sides
- Aluminum interior with stainless steel floor
- (3) adjustable PVC coated shelves
- Interior lighting
- 1-1/2" castors

*Some units may vary

Freezer Cabinet 19 cu ft

115v/60/1
6.8 amps

- Reach-in
- -10 F
- One-section
- Stainless steel door
- Stainless steel front
- Aluminum sides
- Aluminum interior with stainless steel floor
- (3) adjustable PVC-coated wire shelves
- Interior lighting
- 2-1/2" castors

*Some units may vary
